

## Retractable power unit

ref. ROCKING

Platen dimensions: 265 x 120 mm  
Overall dimensions: 265 x 120 x 68 mm  
Hole in the wooden top: 225 x 112 mm  
Connection terminal for 2 P+E sockets  
RJ45 sockets: 5e cat

ROCKING is a compact power unit with 2 power sockets 220V (2P+E) and 3 RJ45 sockets. This unit is fitted into a hole in the bench top or in the table top. In shut position, sockets are protected from dust and the total area of the top can be used. A pressure on the button opens slowly the shutter which rocks in 45° tilted position thanks to spring-loaded jacks. Press on the upper shutter to lock the power unit in close position. ROCKING power unit is necessary when workstation only needs one mains socket or two (for the power supply of few appliances). A same bench or table can be equipped with several ROCKING units if necessary.
